Summary

Full Stack Developer with experience in building scalable web applications and RESTful APIs using Next.js, Node.js, and MongoDB. Proficient in TypeScript, with a strong focus on performance, security, and user experience.

Skills

| Languages | Frontend | Backend | Database | State Management | Tools & Platforms |
|-----------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------|-----------------------------------------------------------|-------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|
| <ul style="list-style-type: none">• JavaScript• TypeScript | <ul style="list-style-type: none">• React• Next.js• TailwindCSS• Bootstrap | <ul style="list-style-type: none">• Node.js• Express.js• REST APIs | <ul style="list-style-type: none">• MongoDB | <ul style="list-style-type: none">• Redux• Context API• Zustand | <ul style="list-style-type: none">• Git• GitHub |

Experience

Frontend Developer | [Tirnu](#)

Oct 2025 – Present

- Built 15+ responsive UI components using React.js and TypeScript, improving development efficiency by 30%
- Integrated REST APIs using TanStack Query with smart caching, reducing redundant network requests and improving data load performance
- Developed a reusable component library with Shadcn UI and Tailwind CSS, ensuring design consistency across 10+ application features
- Contributed to weekly code reviews, upholding 95%+ code quality standards and providing constructive feedback to peers

Tech Stack: *React.js, TypeScript, Tailwind CSS, Shadcn UI, REST APIs, TanStack Query*

Projects

Curex – Smart Symptom Assessment & Healthcare Booking System | [GitHub](#)

A comprehensive healthcare platform that allows users to assess symptoms, receive intelligent suggestions, and book appointments with doctors from verified hospitals.

- Implemented authentication and authorization (Login, Register) with secure session management
- Designed a dashboard for doctors to manage appointments and respond to patient queries
- Developed an admin panel to verify doctor credentials and manage users across all roles
- Focused on performance, security, and responsiveness across all user-facing interfaces

Tech Stack: *Next.js, React, Node.js, Express.js, MongoDB, TypeScript, TailwindCSS, Zustand, Resend*

Education

Bachelor of Computer Applications

2026

Chitwan College of Technology • Bharatpur, Bagmati

Science (High School)

2021

Vidya Mandir Secondary School • Baglung Bazar, Gandaki
